|   |  |                                 |
|---|--|---------------------------------|
| <b>Course Title:</b>                    | <b>Advanced Java</b>   |                                 |
| <b>Course Code:</b> 23SBCA51MM          | <b>No. Of Credits:</b> 02  |                                 |
| <b>Course Type:</b> MM(Major Mandatory) |  | <b>Total Teaching Hours:</b> 30 |
| <b>Sr.No.</b>                           | <b>Course Objectives</b>   |                                 |
| 1.                                      | To Learn The Creation Of Pure Dynamic Web Application Using JDBC.      |                                 |
| 2.                                      | To Understand Concept Of Multithreading.                               |                                 |
| 3.                                      | To Learn Server-Side Programming Using Servlets And Java Server Pages. |                                 |

|  |   |
|--|---|
| <b>Sr.No.</b>                                      | <b>Course Outcome</b>                                     |
| After completing course students will be able to - |   |
| 1.   | Know the concepts of JDBC Programming.                    |
| 2.   | Design and develop real world multithreaded applications. |
| 3.   | Develop the project by using JSP and JDBC                 |

| <b>Course Type:</b> | <b>MM(Major Mandatory)</b> | <b>Total Teaching Hours:30</b>                                      |
| <b>Sr.No.</b>       |                            | <b>Course Objectives</b>  |
| 1.                  |                            | To Build The Fundamentals Of Data Science                           |
| 2.                  |                            | To Learn Techniques And Tools For Transformation Of Data            |
| 3.                  |                            | To Learn The Models For Big Data Problems                           |
| 4.                  |                            | Empowering Students With Tools And Techniques Used In Data Science. |

| <b>Sr.No.</b>                                      | <b>Course Outcome</b>   |
|--|---|
| After Completing Course Students Will Be Able To - |   |
| 1.   | Gain insights into the data science process and the responsibilities of a data scientist.                                     |
| 2.   | Acquire, clean, transform, and manipulate data using libraries like NumPy and Pandas.   |
| 3.   | Perform exploratory data analysis, apply statistical models, and derive insights while assessing data quality.                |
| 4.   | Utilize computing theory, algorithms, and optimization principles to formulate data-driven solutions for business challenges. |

| <b>Unit No</b> | <b>Title with Contents</b>  | <b>No. of Lectures</b>   |
|----------------|---|--|
| <b>Unit I</b>  | <b>INTRODUCTION TO DATA SCIENCE</b>   | <b>4</b>   |
|                | <b>1. What is Data?</b><br><b>2. Types of Data:</b> <ul style="list-style-type: none"> <li>i. Structured</li> <li>ii. Unstructured</li> <li>iii. Semi-structured</li> </ul> <b>3. What is Data Science?</b><br><b>4. Data science process</b><br><b>5. Stages in a Data Science project</b><br><b>6. Applications of Data Science in various fields</b><br><b>7. Basics of Data Analytics</b><br><b>8. Types of Analytics :</b> <ul style="list-style-type: none"> <li>iv. Descriptive</li> <li>v. Predictive</li> <li>vi. Prescriptive</li> </ul>  | <b>1</b><br><b>1</b><br><b>1</b><br><b>1</b>                         |
| <b>Unit II</b> | <b>Data Pre-Processing &amp; Exploratory Data Analysis</b>  | <b>7</b>   |
|                | <b>1. Data Collection:</b> <ul style="list-style-type: none"> <li>i. Primary Data Collection</li> <li>ii. Secondary Data Collection</li> </ul> <b>2. Data Cleaning:</b> <ul style="list-style-type: none"> <li>i. Handling missing values</li> <li>ii. duplicate data</li> <li>iii. outliers and inconsistent data</li> </ul> <b>3. Data Transformation:</b> <ul style="list-style-type: none"> <li>i. Feature scaling</li> <li>ii. Encoding categorical variables</li> </ul> <b>4. Data Integration:</b> <ul style="list-style-type: none"> <li>i. Combining datasets</li> </ul> <b>5. Data Reduction</b><br><b>6. Descriptive statistics:</b> <ul style="list-style-type: none"> <li>i. Central tendency (mean, median, mode).</li> <li>ii. Dispersion (range, variance, standard deviation, IQR).</li> <li>iii. Distribution analysis (skewness, kurtosis).</li> </ul> | <b>1</b><br><b>1</b><br><b>1</b><br><b>1</b><br><b>1</b><br><b>2</b> |

| <b>Unit III</b> | <b>Python Toolbox For Data Science</b>   | <b>13</b> |
|-----------------|--|-----------|
|                 | <p><b>1. NumPy Array:</b></p> <ul style="list-style-type: none"> <li>i. Creating NumPy arrays: np.array(), np.arange(), np.linspace(), np.zeros(), np.ones()</li> <li>ii. Array shape, size, and dimensions</li> <li>iii. Indexing and slicing of NumPy arrays</li> <li>iv. Reshaping arrays with reshape()</li> <li>v. Transposing Array</li> </ul> <p><b>2. Numpy Array Operations</b></p> <ul style="list-style-type: none"> <li>i. Basic mathematical operations (addition, subtraction, multiplication, division)</li> <li>ii. Universal functions (ufuncs): element-wise operations (e.g., np.sqrt(), np.exp())</li> <li>iii. Aggregation functions: np.sum(), np.mean(), np.median(), np.std()</li> <li>iv. Statistical operations: np.var(), np.min(), np.max()</li> <li>v. Axis operations: summing along rows or columns</li> <li>vi. Changing the shape of arrays: flatten(), ravel(), resize()</li> </ul> <p><b>3. Introduction to Pandas</b></p> <ul style="list-style-type: none"> <li>i. Introduction to Pandas</li> <li>ii. Importance of Pandas in data science</li> <li>iii. Series: Creating Series, indexing, Reindexing, Dropping entries from Series and slicing</li> <li>iv. DataFrame: Creating DataFrames, Accessing rows and columns in a DataFrame ,Reindexing DataFrames, Dropping entries DataFrames<br/>Mapping and Replacing: map(), replace()</li> </ul> <p><b>4. Data Visualization using Matplotlib and Seaborn</b></p> <ul style="list-style-type: none"> <li>i. Histograms.</li> <li>ii. Boxplots.</li> <li>iii. Heatmaps</li> <li>iv. Bar Graph</li> <li>v. Pie Charts</li> </ul> |           |
| <b>Unit IV</b>  | <b>Model development and evaluation</b>  | <b>7</b>  |
|                 | <p><b>1. Choosing the right model based on the problem</b></p> <p><b>2. Model Selection</b></p> <ul style="list-style-type: none"> <li>i. Choosing between regression, classification, clustering, or deep learning models</li> <li>ii. Selecting the right algorithm (e.g., Linear Regression, Decision Tree)</li> </ul> <p><b>3. Training Models</b></p> <ul style="list-style-type: none"> <li>i. Splitting the Data</li> <li>ii. Training the Model</li> </ul> <p><b>4. Model Evaluation Metrics</b></p> <ul style="list-style-type: none"> <li>i. Regression metrics (e.g., RMSE, MSE, MAE)</li> <li>ii. Classification metrics (e.g., Accuracy, Precision, Recall, F1 Score, AUC-ROC)</li> <li>iii. Cross Validation</li> <li>iv. Overfitting and Underfitting</li> </ul>  |           |

### T.Y.B.C.A (Science) SEM V (NEP Pattern-2023)

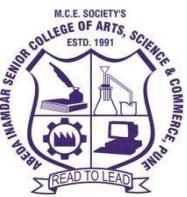

| <b>Course Title:</b> |  | <b>Operating Systems</b>       |
|----------------------|--|--------------------------------|
| <b>Course Code:</b>  |  | <b>No. Of Credits: 02</b>      |
| <b>Course Type:</b>  |  | <b>Total Teaching Hours:30</b> |
| <b>Sr.No.</b>        | <b>Course Objectives</b>   |                                |
| 1.                   | Understand the fundamental concepts of Operating Systems.                                |                                |
| 2.                   | To Understand The Notion Of Inter-Process Communication.                                 |                                |
| 3.                   | To Study Algorithms For CPU-Scheduling, Process Creation And Termination.                |                                |
| 4.                   | To Learn Critical-Section Problems And Classical Process-Synchronization Problems.       |                                |
| 5.                   | To Know The Concept Of Deadlock, Different Methods For Preventing Or Avoiding Deadlocks. |                                |
| 6.                   | To Study The Techniques For Memory Management.   |                                |
| 7.                   | To Learn And Understand File System And Directory Structure.                             |                                |

| <b>Sr.No.</b>                                      | <b>Course Outcome</b>                                   |
|--|---|
| After Completing Course Students Will Be Able To - |   |
| 1.   | Describe Algorithms For Process Scheduling.             |
| 2.   | Apply Technique For Inter-Process Communication.        |
| 3.   | Implement Concept Of Critical-Section.                  |
| 4.   | Compare And Contrast Deadlock Avoidance And Prevention. |
| 5.   | Use Functions For File System Management.               |

| Unit No  | Title with Contents  | No. of Lectures  |
|----------|--|--|
| Unit I   | Introduction to Operating System   | 03   |
|          | <b>1. Operating Systems Overview</b> <ul style="list-style-type: none"> <li>i. Introduction</li> <li>ii. Definition of Operating system operations</li> <li>iii. Types of operating system</li> <li>iv. Operating system services and systems calls</li> <li>v. Unix Fundamentals           <ul style="list-style-type: none"> <li>a. History and Features of Unix</li> <li>b. Unix Architecture               <ul style="list-style-type: none"> <li>i. Kernel</li> <li>ii. Shell Utilities</li> </ul> </li> <li>c. Unix File System               <ul style="list-style-type: none"> <li>i. Hierarchy</li> <li>ii. Permissions</li> <li>iii. Access Control</li> </ul> </li> </ul> </li> </ul> | <b>1</b><br><br><b>2</b>                                 |
| Unit II  | Process Management   | 02   |
|          | <b>1. Process Scheduling</b> <ul style="list-style-type: none"> <li>i. Scheduling queues</li> <li>ii. Schedulers</li> <li>iii. Context switch</li> </ul> <b>2. Operations on Process</b> <ul style="list-style-type: none"> <li>i. Process concept           <ul style="list-style-type: none"> <li>a. Process State</li> <li>b. Process Control Block</li> </ul> </li> <li>ii. Process creation (<b>Fork system call</b>)</li> <li>iii. Process termination (<b>Kill system call</b>)</li> </ul>  | <b>1</b><br><br><b>1</b>                                 |
| Unit III | CPU Scheduling   | 05   |
|          | <b>1. Introduction</b><br><b>2. Scheduling Concepts</b> <ul style="list-style-type: none"> <li>i. CPU-I/O burst cycle</li> <li>ii. CPU Scheduler</li> <li>iii. Preemptive and Non-Preemptive Scheduling</li> <li>iv. Dispatcher</li> </ul> <b>3. Scheduling Criteria</b><br><b>4. Scheduling Algorithms</b> <ul style="list-style-type: none"> <li>i. FCFS</li> <li>ii. SJF</li> <li>iii. Priority scheduling</li> <li>iv. Round-robin scheduling</li> </ul>   | <b>1</b><br><br><b>1</b><br><br><b>1</b><br><br><b>2</b> |

|                 |   |  |
|-----------------|---|--|
| <b>Unit IV</b>  | <b>Process Synchronization</b>  | <b>04</b>  |
|                 | <b>1. Introduction</b><br><b>2. Critical Section Problem</b><br><b>3. Semaphores</b> <ul style="list-style-type: none"> <li>i. Usage</li> <li>ii. Implementation</li> <li>iii. Deadlock &amp; Starvation</li> </ul> <b>4. Classic Problems of Synchronization</b> <ul style="list-style-type: none"> <li>i. Dining Philosopher Problem</li> </ul>   | <b>1</b><br><b>2</b><br><b>1</b>                         |
| <b>Unit V</b>   | <b>Deadlocks</b>  | <b>05</b>  |
|                 | <b>1. System Model</b><br><b>2. Deadlock Characterization</b><br><b>3. Deadlock Prevention</b><br><b>4. Deadlock Avoidance</b> <ul style="list-style-type: none"> <li>i. Bunker's Algorithm</li> </ul> <b>5. Deadlock Detection</b><br><b>6. Recovery from Deadlock</b>   | <b>1</b><br><b>1</b><br><b>1</b><br><b>1</b><br><b>1</b> |
| <b>Unit VI</b>  | <b>Memory Management</b>  | <b>08</b>  |
|                 | <b>1. Introduction to Memory Management</b> <ul style="list-style-type: none"> <li>i. Memory Hierarchy (Primary, secondary, cache)</li> </ul> <b>2. Contiguous Memory Allocation</b> <ul style="list-style-type: none"> <li>i. Single Partition Allocation</li> <li>ii. Multiple Partition Allocation</li> <li>iii. External and Internal Fragmentation</li> </ul> <b>3. Paging</b><br><b>4. Segmentation</b><br><b>5. Virtual Memory</b><br><b>6. Demand paging</b><br><b>7. Page Replacement Algorithms</b> <ul style="list-style-type: none"> <li>i. FIFO</li> <li>ii. Optimal Replacement</li> <li>iii. LRU</li> <li>iv. Second Chance Algorithm</li> </ul> | <b>1</b><br><b>2</b><br><b>2</b><br><b>3</b>             |

### T.Y.B.C.A (Science) SEM V (NEP Pattern-2023)

| Course Title                    | Introduction to JavaScript  |
|---------------------------------|---|
| Course Code: 23SBCA51MEA        | No. Of Credits: 02  |
| Course Type: ME(Major Elective) | Total Teaching Hours:30   |
| Sr.No.                          | Course Objectives   |
| 1.                              | To introduce JavaScript as a fundamental language for web development.  |
| 2.                              | To understand JavaScript syntax, data types, and control structures.  |
| 3.                              | To explore object-oriented programming and JavaScript scope, DOM manipulation and event handling for interactive web pages. |

| Sr.No.   | Course Outcome  |
|--|---|
| After Completing Course Students Will Be Able To - |   |
| 1.   | Explore JavaScript syntax, variables, and data types and control flow statements  |
| 2.   | Learn about JavaScript objects, their properties, and methods.                    |
| 3.   | Learn about the Document Object Model (DOM) and how to manipulate it dynamically. |

### T.Y.B.C.A (Science) SEM V (NEP Pattern-2023)

| Course Title  | React JS                |
|---|-------------------------|
| Course Code: 23SBCA52MEA  | No. Of Credits: 02      |
| Course Type: ME(Major Elective)   | Total Teaching Hours:30 |
| Sr. No.   | Course Objectives       |
| <p>1. To introduce the fundamentals of ReactJS and its advantages in modern web development.</p> <p>2. To enable students to manage state and props effectively in React applications.</p> <p>3. To familiarize students with event handling, lists, keys, and component lifecycle methods, React hooks, routing.</p> |                         |

| Sr.No.   | Course Outcome   |
|--|--|
| After Completing Course Students Will Be Able To - |  |
| 1.   | Understand props and state for data handling in React components.  |
| 2.   | Fetch data and handle side effects using lifecycle methods.        |
| 3.   | Understand state management techniques like Redux and Context API. |

| <b>Unit No</b>  | <b>Title with Contents</b>  | <b>No. of Lectures</b> |
|-----------------|---|------------------------|
| <b>Unit I</b>   | <b>Introduction to ReactJS</b>  | <b>10</b>              |
|                 | <b>1. Introduction to ReactJS</b> <ul style="list-style-type: none"> <li>i. What is React and why use it?</li> <li>ii. Setting up a React project with Create React App</li> <li>iii. React component structure<br/>(Class vs Functional components)</li> </ul> <b>2. JSX Syntax and Rendering Elements</b> <ul style="list-style-type: none"> <li>i. Understanding JSX</li> <li>ii. Rendering React components</li> <li>iii. Conditional rendering in JSX</li> </ul> <b>3. React Components and Props</b> <ul style="list-style-type: none"> <li>i. Functional components</li> <li>ii. Understanding Props</li> <li>iii. Passing data to components</li> </ul> <b>4. State in React</b> <ul style="list-style-type: none"> <li>i. Understanding state and useState hook</li> <li>ii. Modifying state</li> <li>iii. State vs props</li> </ul> | 2<br>2<br>3<br>3       |
| <b>Unit II</b>  | <b>Event Handling</b>   | <b>9</b>               |
|                 | <b>1. Handling Events in React</b> <ul style="list-style-type: none"> <li>i. Event handling in React<br/>(onClick, onSubmit, etc.)</li> <li>ii. Binding event handlers</li> <li>iii. Passing arguments to event handlers</li> </ul> <b>2. Lists and Keys in React</b> <ul style="list-style-type: none"> <li>i. Rendering lists dynamically</li> <li>ii. Keys in lists</li> <li>iii. Optimizing re-renders</li> </ul> <b>3. React Lifecycle Methods (Class Components)</b> <ul style="list-style-type: none"> <li>i. Component mounting and unmounting</li> <li>ii. Lifecycle methods<br/>(componentDidMount, componentWillUnmount, etc.)</li> <li>iii. Using lifecycle methods for data fetching</li> </ul>  | 3<br>3<br>3            |
| <b>Unit III</b> | <b>Advanced React JS</b>  | <b>11</b>              |

|  |   |                     |
|--|---|---------------------|
|  | <p><b>1. React Hooks - useEffect and useContext</b></p> <ul style="list-style-type: none"> <li>i. useEffect for side effects</li> <li>ii. useContext for global state management</li> </ul> <p><b>2. Routing in React (React Router)</b></p> <ul style="list-style-type: none"> <li>i. Setting up React Router</li> <li>ii. Route and Link components</li> <li>iii. Nested routes and route parameters</li> </ul> <p><b>3. State Management in React (Redux or Context API)</b></p> <ul style="list-style-type: none"> <li>i. Introduction to Redux or Context API</li> <li>ii. Actions, reducers, and the store</li> <li>iii. Managing state across multiple components</li> </ul> | 2<br><br>4<br><br>5 |

| <b>Course Code:</b> | <b>23SBCA51MNB</b>   | <b>No. Of Credits:</b>                                       | <b>02</b> |
| <b>Course Type:</b> | <b>MN(Minor Theory)</b>  | <b>Total Teaching Hours:</b>                                 | <b>30</b> |
| Sr.No.              | <b>Course Objectives</b>   |  |           |
| 1.                  | To introduce the concept and architecture of single-board systems (SBS).                                       |  |           |
| 2.                  | To provide hands-on experience with programming and interfacing single-board computers                         |  |           |
| 3.                  | To develop skills to implement real-world applications using SBS.  |  |           |
| 4.                  | To familiarize the students with the programming and interfacing of different devices with SBS (Raspberry Pi). |  |           |

| <b>Sr.No.</b>                                      | <b>Course Outcome</b>  |
|--|--|
| After completing course students will be able to - |  |
| 1.   | Understand the architecture and components of single-board system like Raspberry Pi. |
| 2.   | Program single-board systems for basic tasks and applications.                       |
| 3.   | Interface sensors, actuators, and other peripherals to develop functional projects.  |
| 4.   | Learn interfacing different peripherals with Raspberry Pi                            |
| 5.   | Design mini project based on Raspberry Pi.   |

| Unit No  | Title with Contents  | No. of Lectures |
|----------|--|-----------------|
| Unit I   | <b>Introduction to Single Board Systems</b>  | <b>5</b>        |
|          | <p><b>1 What is a Single Board System?</b></p> <p><b>2 Overview of Popular SBS:</b></p> <ul style="list-style-type: none"> <li>i. Arduino (Microcontroller-based system)</li> <li>ii. Raspberry Pi (Single-board computer)</li> </ul> <p><b>3 Comparison of SBS with traditional microcontroller and microprocessor systems.</b></p> <p><b>4 Applications of Single Board Systems in IoT, Robotics, and Embedded Systems.</b></p>  |                 |
| Unit II  | <b>Architecture and Programming of Single Board System</b>   | <b>10</b>       |
|          | <p><b>1 Raspberry Pi – Introduction-Basics, applications, installation.</b></p> <p><b>2 Pin Description of Raspberry Pi,</b></p> <p><b>3 Preparing SD Card for Raspberry Pi</b></p> <p><b>4 Introduction to Raspbian OS and other operating systems for Raspberry Pi.</b></p> <p><b>5 First boot, Configuration, time setting, keyboard layout, disk expand, etc.</b></p> <p><b>6 Function of GPIO Pins and Interfacing</b></p> <p><b>7 Introduction to Libraries</b></p>  |                 |
| Unit III | <b>Interfacing of devices using Python Programming</b>   | <b>15</b>       |
|          | <p><b>1 Sensors:</b></p> <ul style="list-style-type: none"> <li>i. Interfacing Temperature Sensors (e.g., DHT11)</li> <li>ii. Light Sensors (LDR)</li> <li>iii. Ultrasonic Sensors (HC-SR04)</li> <li>iv. motion sensor(PIR Sensor)</li> </ul> <p><b>2 Actuators:</b></p> <ul style="list-style-type: none"> <li>i. Controlling LEDs ,</li> <li>ii. Switches ,</li> <li>iii. Relays,</li> <li>iv. Motor Control (DC, Servo, Stepper)</li> </ul> <p><b>3 Communication Interfaces:</b></p> <ul style="list-style-type: none"> <li>i. I2C</li> <li>ii. SPI</li> <li>iii. UART communication protocol</li> <li>iv. Bluetooth</li> <li>v. Wifi</li> <li>vi. Ethernet</li> <li>vii. Camera</li> <li>viii. Serial Communication GSM</li> </ul> |                 |

| Course Title            | Field Project  |
|-------------------------|--|
| Course Code: 23SBCA51FP | No. Of Credits:02  |
| Course Type: FP         | Total Teaching Hours:60  |
| Sr.No.                  | Course Objectives  |
| 1.                      | To understand concepts of Project Management   |
| 2.                      | To know how various tools for development and management of software projects are used to carry out various tasks involved |
| 3.                      | To learn the importance of project documentation.  |

| Sr.No.   | Course Outcome  |
|--|---|
| After completing course students will be able to - |   |
| 1.   | Demonstrate a sound technical knowledge of selected project topic.                        |
| 2.   | Apply techniques for project management   |
| 3.   | Create various documents used during the development of the project and a project report. |

| Sr no     | Guidelines   |
|-----------|--|
| <b>1</b>  | Students shall choose any topic for project work in consultation with project guide, Project In-charge and head of the department  |
| <b>2</b>  | The students shall work on a Project in a group of not more than three students.   |
| <b>3</b>  | Students are expected to work on the chosen project during the entire semester.  |
| <b>4</b>  | Students shall undertake application oriented/web-based/database-oriented/research based work.   |
| <b>5</b>  | Students shall successfully implement the chosen work. Only a hypothetical / theoretical study shall not be accepted   |
| <b>6</b>  | Students shall choose any appropriate programming language/ platform, computational techniques and tools in consultation with the guide, In-charge and the head of the department  |
| <b>7</b>  | The faculty members from affiliated college shall act as a project guide for each project group with equal distribution of groups amongst each eligible faculty.   |
| <b>8</b>  | The guide shall track and monitor the project progress on a weekly basis by considering the workload of 4 laboratory hours per week.   |
| <b>9</b>  | The project work shall be evaluated based on the novelty of the topic, scope of the work, relevance to computer science, adoption of emerging techniques/technologies and its real-world application etc.  |
| <b>10</b> | <p>Students shall prepare a project report with the following contents:</p> <ul style="list-style-type: none"> <li>a) Title Page</li> <li>b) Certificate</li> <li>c) Index Page detailing description of the following with their sub sections:           <ul style="list-style-type: none"> <li>- - -Title: A suitable title giving the idea about what work is proposed. –</li> <li>-Introduction: An introduction to the topic giving proper</li> <li>- Background of the topic.</li> <li>-Requirement Specification:</li> <li>-Specify Software/hardware/data requirements.</li> <li>- System Design details</li> <li>:Methodology/Architecture/UML/DFD/Algorithms/protocols used(whichever is applicable)</li> <li>- System Implementation: Code</li> <li>-Results: Test Cases/Tables/Figures/Graphs/Screen shots/Reports etc.</li> <li>- Conclusion and Future Scope: Specify the Final conclusion and future scope</li> <li>- References: Books, web links, research articles etc.</li> </ul> </li> </ul> |
| <b>11</b> | The Project report should be prepared in a spiral bound form with adequate number of copies. Copy shall be submitted to the guide and college for the records.   |
| <b>12</b> | The Project work and report shall be certified by the concerned Project guide and Head of the department.  |

|   |   |   |                 |   |          |                                      |    |                                     |    |             |    |
|---|---|---|-----------------|---|----------|--------------------------------------|----|-------------------------------------|----|-------------|----|
| <b>13</b>   | <p>Students shall make a presentation of working project and will be evaluated as per the Project evaluation scheme as detailed below</p> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 70%;">1. <b>Continuous Evaluation, Progress Report:</b></td><td style="width: 30%; text-align: right;"><b>20 marks</b></td></tr> <tr> <td>2. <b>End Semester Examination in the form of</b></td><td style="text-align: right;">30 marks</td></tr> <tr> <td>    i.     Presentation &amp; Project Report</td><td style="text-align: right;">10</td></tr> <tr> <td>    ii.    Demonstration of the Project</td><td style="text-align: right;">15</td></tr> <tr> <td>    iii.   Viva</td><td style="text-align: right;">05</td></tr> </table> | 1. <b>Continuous Evaluation, Progress Report:</b> | <b>20 marks</b> | 2. <b>End Semester Examination in the form of</b> | 30 marks | i.     Presentation & Project Report | 10 | ii.    Demonstration of the Project | 15 | iii.   Viva | 05 |

| <b>Course Title</b>                     | <b>Data Mining Using Python</b>   |
| <b>Course Code:</b> 23SBCA62MM          | <b>No. Of Credits:</b> 02   |
| <b>Course Type:</b> MM(Major Mandatory) | <b>Total Teaching Hours:</b> 30   |
| <b>Sr.No.</b>                           | <b>Course Objectives</b>  |
| 1.                                      | To understand data warehouse concepts, architecture, business analysis and tools.     |
| 2.                                      | To understand data pre-processing and data visualization techniques.                  |
| 3.                                      | To study algorithms for finding hidden and interesting patterns in data.              |
| 4.                                      | To understand and apply various classification and clustering techniques using tools. |

| <b>Sr.No.</b>  | <b>Learning Outcome</b>  |
|--|--|
| After Completion of this course students will able to- |  |
| 1.   | Need of data mining and apply suitable pre-processing techniques for data analysis |
| 2.   | Apply frequent pattern and association rule mining techniques for data analysis    |
| 3.   | Apply appropriate classification and prediction techniques for data analysis       |
| 4.   | Apply appropriate clustering techniques for data analysis                          |
| 5  | Design a Data warehouse system and perform business analysis with OLAP tools       |

| <b>Course Title</b>              | <b>Computing Science In Ancient India</b>  |                                 |
| <b>Course Code:</b> 23SBCA127IKS | <b>No. Of Credits:</b> 02  |                                 |
| <b>Course Type:</b> IKS (Major)  |  | <b>Total Teaching Hours:</b> 30 |
| <b>Sr.No</b>                     | <b>Course Objectives</b>   |                                 |
| 1.                               | To provide an overview of the ancient Indian knowledge system and its contributions to the field of computing. |                                 |
| 2.                               | To analyse the basics of decimal system and binary number system.  |                                 |
| 3.                               | To understand origin of modern hashing technique.  |                                 |
| 4.                               | To explore Panini's BNF form in formal language theory   |                                 |
| 5.                               | To know formal structure of Indian logics  |                                 |

| <b>Sr.No.</b>                                      | <b>Course Outcome</b>  |
|--|--|
| After completing course students will be able to - |  |
| 1.   | Describe the ancient Indian knowledge system and its contributions to mathematics. |
| 2.   | Explain the basics of decimal system and binary number system.                     |
| 3.   | Describe modern hashing techniques.  |
| 4.   | Evaluate the connections of Panini's grammar in computing science.                 |
| 5.   | Understand the logic in Indian philosophy  |

| <b>Course Title</b>                    | <b>React Native</b>             |
| <b>Course Code:</b> 23SBCA62MEA        | <b>No. Of Credits:</b> 02       |
| <b>Course Type:</b> ME(Major Elective) | <b>Total Teaching Hours:</b> 30 |

| Sr.No. | <b>Course Objectives</b>   |
|--------|--|
| 1.     | Understand the fundamentals of React Native and its components.          |
| 2.     | Learn to create and use fundamental React Native components.             |
| 3.     | Learn how to implement navigation between screens in a React Native app. |
| 4.     | Understand how to fetch data from APIs and manage state in React Native. |
| Sr.No. | <b>Course Outcome</b>  |

On completion of the course, student will be able to—

|    |  |
|----|--|
| 1. | Understand the Fundamentals of React Native  |
| 2. | Work with Core React Native Components       |
| 3. | Implement Navigation in React Native Apps    |
| 4. | Understand and apply strategies for handling |

| Course Contents |  |   |
|-----------------|--|---|
| Unit I          | Introduction to React Native   | 14 Hrs                                    |
|                 | 1. What is React Native?<br>2. Difference between React and React Native.<br>3. Advantages of React Native for mobile development.<br>4. Setting up the development environment. <ul style="list-style-type: none"> <li>i. Installing Node.js, npm, Expo, and React Native CLI.</li> <li>ii. Emulator setup (Android/iOS).</li> </ul> 5. React Native project structure.<br>6. Core Components: View, Text, Image, TextInput, Button, ScrollView, FlatList, etc.<br>7. Understanding Flexbox for layout.<br>8. Styling in React Native: Inline styles vs. StyleSheet API. Platform-specific styling (iOS/Android differences).                                     | 1<br>1<br>1<br>2<br>1<br>2<br>2<br>2<br>2 |
| Unit II         | Navigation in React Native Working with APIs and Data Management   | 8 Hrs                                     |
|                 | 1. Introduction to React Navigation library.<br>2. Stack navigation, tab navigation, and drawer navigation.<br>3. Passing data between screens.<br>4. Navigating with buttons and links.<br>5. Introduction to Fetch API and Axios for HTTP requests.<br>6. Using useState and useEffect for data fetching and state management.<br>7. Working with JSON data and asynchronous operations.<br>8. Introduction to Context API and Redux (for larger apps).  | 1<br>1<br>1<br>1<br>1<br>1<br>1<br>1      |
| Unit III        | Advanced REACT NATIVE  | 8 Hrs                                     |
|                 | <b>1. Handling User Input and Forms</b> <ul style="list-style-type: none"> <li>i. TextInput components and controlled components.</li> <li>ii. Form validation techniques.</li> <li>iii. Handling button clicks and gestures.</li> <li>iv. Keyboard handling (hiding and showing keyboard).</li> </ul> <b>2. Advanced Features and Native Modules</b> <ul style="list-style-type: none"> <li>i. Using device features: Camera, Geolocation, Push Notifications.</li> <li>ii. Introduction to Native Modules and bridging.</li> <li>iii. Working with third-party libraries and plugins.</li> <li>iv. Debugging and performance optimization techniques.</li> </ul> | 4<br>4                                    |

| <b>Course Code:</b> 23SBCA61MNA | <b>No. Of Credits:</b> 02   |                                 |
| <b>Course Type:</b> MN(Minor)   |   | <b>Total Teaching Hours:</b> 30 |
| <b>Sr.No.</b>                   | <b>Course Objectives</b>  |                                 |
| 1.                              | Develop a Deep Understanding of Ethical Hacking Concepts.                       |                                 |
| 2.                              | Equip Students with Tools and Techniques for Information Gathering and Scanning |                                 |
| 3.                              | Enable Practical Knowledge in Exploiting Vulnerabilities and Post-Exploitation  |                                 |
| 4.                              | Enhance Understanding of Web Application Security                               |                                 |

| <b>Sr.No.</b>                                      | <b>Course Outcome</b>  |
|--|--|
| After completing course students will be able to - |  |
| 1.   | Apply Ethical Hacking Techniques to Identify Vulnerabilities |
| 2.   | Demonstrate Practical Penetration Testing Skills             |

| <b>Unit No</b> | <b>Title with Contents</b>   | <b>No. of Lectures</b> |
|----------------|--|------------------------|
| <b>Unit I</b>  | <b>Introduction to Ethical Hacking</b> <ul style="list-style-type: none"> <li><b>1. Overview of Ethical Hacking</b> <ul style="list-style-type: none"> <li>i. What is ethical hacking?</li> <li>ii. Difference between ethical hackers, hackers, and cybercriminals.</li> </ul> </li> <li><b>2. Types of Hackers</b> <ul style="list-style-type: none"> <li>i. White hat</li> <li>ii. Black hat</li> <li>iii. Grey hat, and others,</li> </ul> </li> <li><b>3. Ethical Hacking Phases</b> <ul style="list-style-type: none"> <li>i. Reconnaissance</li> <li>ii. Scanning</li> <li>iii. Gaining Access</li> <li>iv. Maintaining Access</li> <li>v. Covering Tracks.</li> </ul> </li> <li><b>4. Tools and Techniques in Ethical Hacking</b> <ul style="list-style-type: none"> <li>i. Kali Linux</li> <li>ii. Metasploit</li> <li>iii. Wireshark</li> <li>iv. Nmap.</li> </ul> </li> <li><b>5. Cyber Laws and Ethics:</b> <ul style="list-style-type: none"> <li>i. Legal aspects of hacking, ethical guidelines, and laws (e.g., IT Act 2000).</li> </ul> </li> </ul> | <b>6</b>               |
| <b>Unit II</b> | <b>Foot printing and Reconnaissance</b>  | <b>8</b>               |
|                | <b>1. Introduction to Information Gathering</b> <ul style="list-style-type: none"> <li><b>2. Types of information gathering</b> <ul style="list-style-type: none"> <li>i. Active gathering</li> <li>ii. Passive gathering.</li> </ul> </li> <li><b>3. Reconnaissance Methods</b> <ul style="list-style-type: none"> <li>iii. DNS Interrogation</li> <li>iv. WHOIS Lookup</li> <li>v. IP Location Tracing</li> <li>vi. Social Engineering</li> <li>vii. Google Dorking</li> </ul> </li> <li><b>4. Footprinting Tools</b> <ul style="list-style-type: none"> <li>viii. Nmap</li> <li>ix. DNSdumpster</li> <li>x. Whois</li> </ul> </li> </ul>  | <b>1</b>               |
|                |  | <b>1</b>               |
|                |  | <b>1</b>               |
|                |  | <b>2</b>               |
|                |  | <b>1</b>               |
|                |  | <b>1</b>               |

|                 |  |                  |
|-----------------|--|------------------|
|                 | xi. Other reconnaissance tools.<br><b>5. Network Footprinting</b><br>Identifying potential targets and vulnerabilities using network scanning.   | <b>1</b>         |
| <b>Unit III</b> | <b>Scanning and Enumeration</b>  | <b>8</b>         |
|                 | <b>1. Scanning Techniques</b> <ul style="list-style-type: none"> <li>i. Port Scanning</li> <li>ii. Service Detection</li> <li>iii. OS Fingerprinting</li> </ul> <b>2. Types of Scanners</b> <ul style="list-style-type: none"> <li>i. Nmap (Network Mapper)</li> <li>ii. Netcat</li> <li>iii. Nessus (Vulnerability Scanning)</li> </ul> <b>3. Enumeration</b> <ul style="list-style-type: none"> <li>i. User enumeration</li> <li>ii. DNS enumeration</li> <li>iii. SNMP enumeration</li> <li>iv. SMB enumeration</li> </ul> <b>4. Identifying Vulnerabilities</b> <ul style="list-style-type: none"> <li>i. Introduction to Vulnerability assessment tools and techniques.</li> </ul>  | 2<br>2<br>2<br>2 |
| <b>Unit IV</b>  | <b>Exploitation and Post-Exploitation</b>  | <b>8</b>         |
|                 | <b>1. Exploitation</b> <ul style="list-style-type: none"> <li>i. Exploiting Vulnerabilities in Web Applications</li> <li>ii. Exploiting Network Vulnerabilities(BufferOverflow, SQL Injection, XSS)</li> <li>iii. Exploiting Wireless Networks</li> </ul> <b>2. Metasploit Framework</b> <ul style="list-style-type: none"> <li>i. Introduction to exploitation frameworks and tools.</li> </ul> <b>3. Post-Exploitation Techniques</b> <ul style="list-style-type: none"> <li>i. Escalating Privileges</li> <li>ii. Creating Backdoors.</li> <li>iii. Stealth Techniques (Rootkits, Keyloggers)</li> </ul> <b>4. Maintaining Access</b> <ul style="list-style-type: none"> <li>i. Creating and using persistent backdoors, remote access Trojans (RATs).</li> </ul> | 2<br>2<br>2<br>2 |
| <b>Unit V</b>   | <b>Web Application Penetration Testing</b>   | <b>8</b>         |
|                 | <b>1. Web Application Security</b> <ul style="list-style-type: none"> <li>i. OWASP Top 10 vulnerabilities (SQL Injection, XSS, CSRF, etc.).</li> </ul>   | <b>1</b>         |

|  |   |                  |
|--|---|------------------|
|  | <p><b>2. Tools for Web Penetration Testing</b></p> <ul style="list-style-type: none"> <li>i. Burp Suite</li> <li>ii. OWASP ZAP</li> <li>iii. Nikto</li> <li>iv. DirBuster.</li> </ul> <p><b>3. Web Application Exploits</b></p> <ul style="list-style-type: none"> <li>i. SQL Injection</li> <li>ii. Cross-Site Scripting (XSS)</li> <li>iii. Cross-Site Request Forgery (CSRF)</li> </ul> <p><b>4. Web Server Security</b></p> <ul style="list-style-type: none"> <li>i. Securing Apache,</li> <li>ii. Nginx,</li> <li>iii. IIS.</li> </ul> <p><b>5. Ethical Hacking of Web Applications</b></p> <ul style="list-style-type: none"> <li>i. Techniques for finding and exploiting vulnerabilities in web applications.</li> </ul> | 2<br>2<br>2<br>1 |

|---------------------------------|--|---------------------------------|
| <b>Course Title</b>             | <b>Fundamentals of IoT and Its Applications</b>  |                                 |
| <b>Course Code:</b> 23SBCA61MNB | <b>No. Of Credits:</b> 02  |                                 |
| <b>Course Type:</b> MN(Minor)   |  | <b>Total Teaching Hours:</b> 30 |
| <b>Sr.No.</b>                   | <b>Course Objectives</b>   |                                 |
| 1.                              | To understand the fundamental concepts of IoT and its architecture.  |                                 |
| 2.                              | To learn about IoT communication protocols and their applications.   |                                 |
| 3.                              | To develop skills using Arduino to control sensors, actuators, and communication modules for IoT applications. |                                 |
| 4.                              | To explore real-world IoT applications and problem-solving techniques.   |                                 |

| <b>Sr.No.</b>                                      | <b>Course Outcome</b>  |
|--|--|
| After completing course students will be able to - |  |
| 1.   | Understand Fundamentals of IoT   |
| 2.   | Develop and debug programs for Arduino to control sensors, actuators, and perform robotic functions. |
| 3.   | Learn to Communication devices used in IoT Systems   |

| <b>Unit No</b> | <b>Title with Contents</b>   | <b>No. of Lectures</b> |
|----------------|--|------------------------|
| <b>Unit I</b>  | <b>Introduction to IoT and Arduino</b>   | <b>10</b>              |
|                | <p><b>1. IoT Fundamentals</b></p> <ul style="list-style-type: none"> <li>i. Definition and Characteristics of IoT</li> <li>ii. Applications of IoT in various domains (e.g., healthcare, agriculture, smart cities).</li> </ul> <p><b>2. Key Components of IoT Systems</b></p> <ul style="list-style-type: none"> <li>i. Things/Devices</li> <li>ii. Gateway</li> <li>iii. Cloud/Server</li> <li>iv. Analytics</li> <li>v. User Interface</li> </ul> <p><b>3. IoT Architecture</b></p> <ul style="list-style-type: none"> <li>i. | <b>Assignment No</b>            | <b>Assignment Name</b>   | <b>No. Of Sessions</b> |
|---------------------------------|--|------------------------|
| 1                               | Blinking an LED at different time intervals.   | 1                      |
| 2                               | Read digital input from a button and control an LED.   | 1                      |
| 3                               | Interfacing of 16x2 LCD for Displaying message.  | 1                      |
| 4                               | Interfacing PIR/ IR Sensors with Arduino to detect motion and turn on an LED.                                      | 1                      |
| 5                               | Interfacing Ultrasonic Sensor with Arduino to measure distance and display it on the serial monitor / LCD display. | 1                      |
| 6                               | Interfacing DHT11/22 Sensor with Arduino to measure temperature and display it on serial monitor / LCD display.    | 1                      |
| 7                               | Interfacing DHT11/22 Sensor with Arduino to measure humidity and display it on serial monitor / LCD display.       | 1                      |
| 8                               | Interfacing servo motor with Arduino and Rotate the servo to specific angles based on input.                       | 1                      |
| 9                               | Interfacing stepper motor with Arduino and Control the motor to move a specific number of steps.                   | 1                      |
| 10                              | Use Relay with Arduino to control a 230V bulb  | 1                      |
| 11                              | Connect an LDR sensor and display its analog values.   | 1                      |
| 12                              | To study Arduino based LED switching using Mobile/Bluetooth Device.  | 1                      |
| 13                              | Sending sensor data to a cloud platform  | 1                      |
| 14                              | To study and interface Zig-bee for one Application using Arduino.  | 1                      |
| 15                              | To Study and interface of RFID system using Arduino.   | 1                      |
| <b>Total Number of Sessions</b> |  | <b>15</b>              |

**M.C.E. Society's  
Abeda Inamdar Senior College**  
Of Arts, Science and Commerce, Camp, Pune- 1 (Autonomous)  
Affiliated to Savitribai Phule Pune University NAAC accredited  
'A' Grade

**T.Y.B.C.A (Science) SEM VI (NEP Pattern-2023)**

| <b>Course Title</b>            | <b>Internship</b>   |
|--------------------------------|---|
| <b>Course Code:</b> 23SBCA6OJT | <b>No. Of Credits:</b> 04   |
| <b>Course Type:</b> OJT        | <b>Total Teaching Hours:</b> 60   |
| <b>Sr.No.</b>                  | <b>Course Objectives</b>  |
| 1.                             | To apply theoretical knowledge gained in the classroom to real-world work environments, enhancing professional skills and understanding of industry practices.  |
| 2.                             | To improve key soft skills such as communication, teamwork, time management, and problem-solving, which are essential for future career success.                |
| 3.                             | To establish professional relationships with industry experts, mentors, and peers, which can provide guidance and potential job opportunities after graduation. |

| <b>Sr.No.</b>                                      | <b>Course Outcome</b>   |
|--|---|
| After completing course students will be able to - |   |
| 1.   | Apply academic knowledge to real-world professional scenarios.          |
| 2.   | Develop industry-specific skills relevant to their career field.        |
| 3.   | Communicate effectively in a professional work environment.             |
| 4.   | Communicate effectively in a professional work environment.             |
| 5.   | Build a professional network and gain insights into industry practices. |

| Sr.No | <b>Internship Rules</b>  |
|-------|--|
| 1     | <p><b>1.</b> Students shall prepare a project report with the following contents:</p> <ul style="list-style-type: none"> <li>a) Title Page</li> <li>b) Certificate</li> <li><b>c) Index Page detailing description of the following with their sub sections:-</b> <ul style="list-style-type: none"> <li>i. Title: A suitable title giving the idea about what work is proposed.</li> <li>ii. Introduction: An introduction to the topic giving proper.</li> <li>iii. Background of the topic.</li> <li>iv. Requirement Specification.</li> <li>v. Specify Software/hardware/data requirements.</li> <li>vi. System Design details</li> </ul> </li> <li><b>2. Methodology/Architecture/UML/DFD/Algorithms/protocols used(whichever is applicable).</b> <ul style="list-style-type: none"> <li>i. System Implementation: Code</li> <li>ii. Results: Test Cases/Tables/Figures/Graphs/Screen shots/Reports etc.</li> <li>iii. Conclusion and Future Scope: Specify the Final conclusion and future scope.</li> <li>iv. References: Books, web links, research articles etc.</li> </ul> </li> </ul> |
| 2     | <b>Only full-time graduate students who meet the required GPA and course prerequisites are eligible for internships.</b>   |
| 3     | Students opting for an internship should obtain prior approval from a faculty advisor before starting the internship.  |
| 4     | Internships may vary in duration from a few weeks (summer internships) to several months. (Semester-long or part-time internships).  |
| 5     | Students are expected to work with flexible hours based on the internship's structure and the organization's schedule. However, this should align with college guidelines and academic Credit requirements.  |
| 6     | Students shall undertake application oriented/ web-based/ database-oriented/ research based work.  |
| 7     | Students shall successfully implement the chosen work. Only a hypothetical /theoretical study shall not be accepted  |
| 8     | Students having internships should attain college at least once a week.  |
| 9     | Students should also submit college assignments on time.   |
| 10    | Students must submit necessary documentation (e.g., learning contracts, reports) to receive academic credit, as required by their college or university.   |
| 11    | The student's performance will be assessed by both the internship supervisor and the college.  |
| 12    | Students must submit a detailed report summarizing their internship experience and learning outcomes.  |
| 13    | Students must adhere to workplace norms and demonstrate ethical behaviour.   |
| 14    | The internship work and report shall be certified by the concerned Internship In-Charge  |
| 15    | Some internships may lead to full-time job offers upon graduation. Interns should stay in touch with employers and express interest in any available opportunities.  |
